

REVIEW PACK

Ellina moodboard corrections

V2 pilot - before, feedback and updated fix

What is in this pack

- Four representative fixes from Ellina's 360-action review manifest.
- The original V1 moodboard beside the implemented V2 asset.
- Ellina's feedback, a precise change log and the self-review decision.
- A reversible iOS implementation: no original moodboard was overwritten or deleted.

IMPLEMENTED

4

V2 moodboards

ROLLBACK

V1 preserved

ELLINA'S FEEDBACK Off vibe, other than the suit. The branded long sleeve is recognisable. Maybe a scarf. Skinny vs layered looks are a signature mix.

ORIGINAL - V1

UPDATED - V2

V2
FIX

WHAT CHANGED

- Rebuilt around sharp tailoring and cool urban styling.
- Added a signature scarf and an explicit skinny-vs-layered contrast.
- Removed generic interiors, bean motifs and repeated outfit ideas.

SELF-REVIEW

APPROVED

Approved for V2. The revised board has distinct looks, mixed casting and a tighter Acne-specific silhouette story.

ELLINA'S FEEDBACK Off vibe. Needs the signature bandana pattern. Overall vibe should be more cowboy-desert (Arizona) than beachy straw.

ORIGINAL - V1

UPDATED - V2

V2
FIX

WHAT CHANGED

- Replaced the generic straw-and-beach direction with a desert setting.
- Made bandana textiles the main product language across distinct bag types.
- Added cowboy details while keeping the focus on bags.

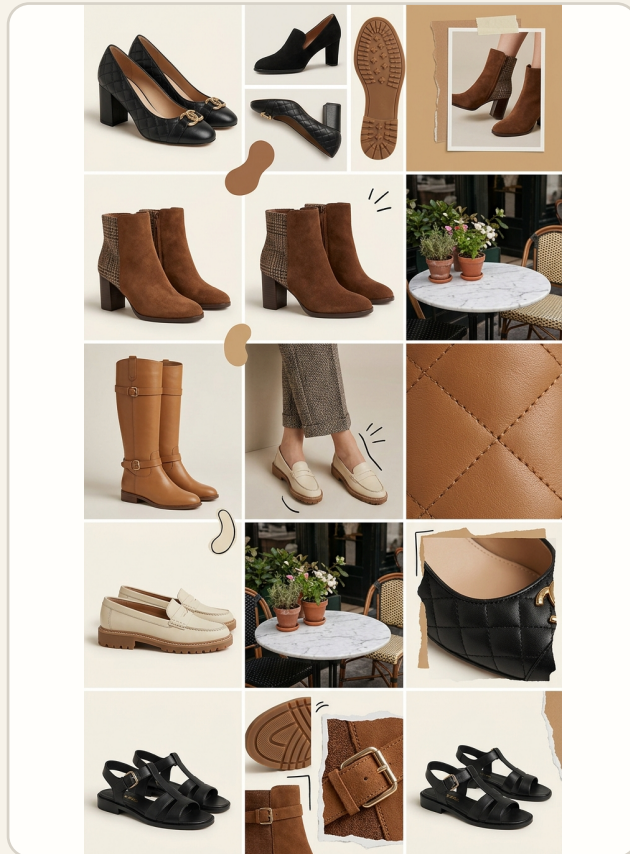

SELF-REVIEW

APPROVED

Approved for V2. The bandana construction and desert cues now answer the feedback directly, with no repeated product crop.

ELLINA'S FEEDBACK Off vibe and bad collage - all a geometric grid with repeated images. Need signature ballet flats, tweed pumps and slingbacks.

ORIGINAL - V1

UPDATED - V2

V2
FIX

WHAT CHANGED

- Replaced the repeated product grid with an editorial torn-paper composition.
- Added two-tone slingbacks, quilted ballet flats and tweed pumps.
- Kept all hero fragments footwear-specific and distinct.

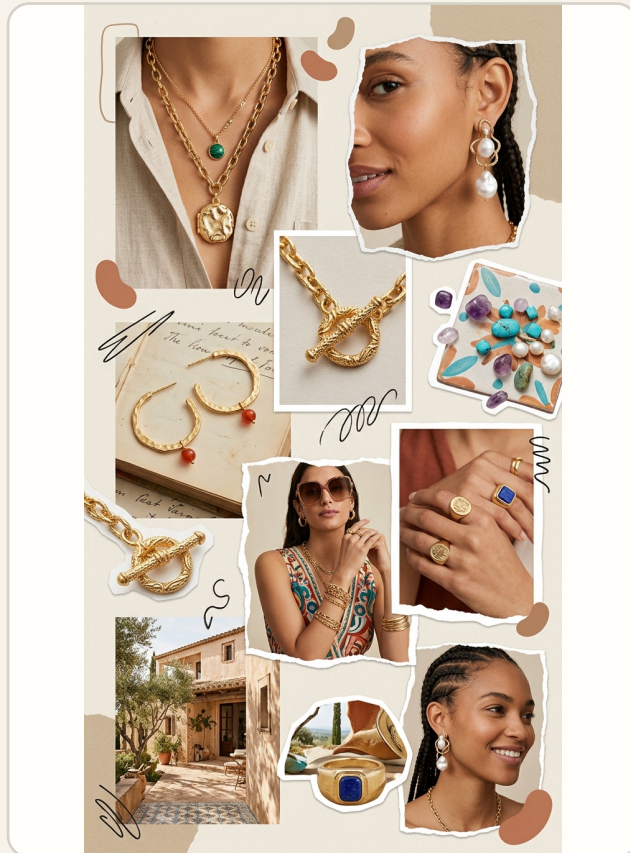

SELF-REVIEW

APPROVED

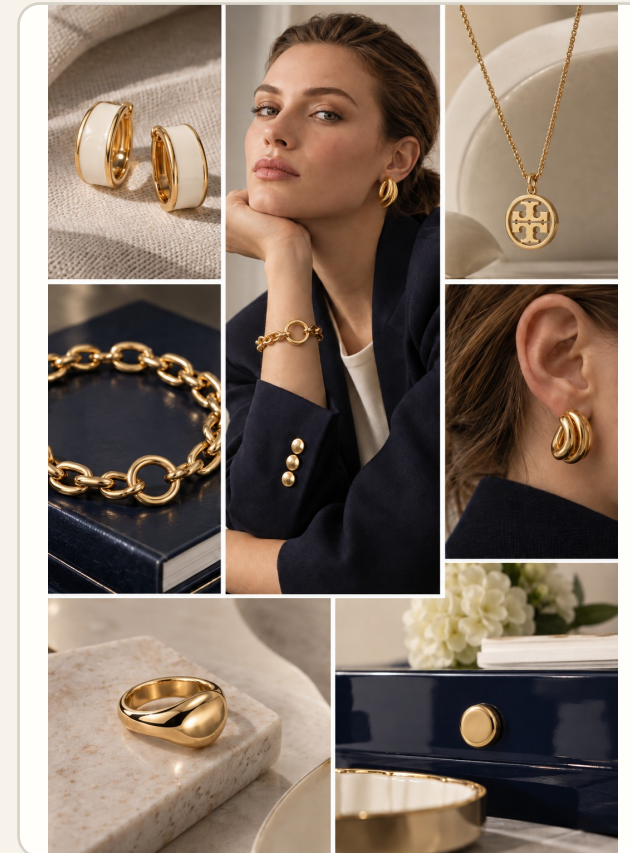

Approved for V2 after rejecting an earlier candidate. The final version contains seven distinct footwear fragments, no handbags and no repeated silhouette.

ELLINA'S FEEDBACK Off vibe. The brand is less boho; include logo elements.

ORIGINAL - V1

UPDATED - V2

V2
FIX

WHAT CHANGED

- Shifted from Mediterranean-boho styling to polished, preppy navy and cream.
- Used cleaner gold forms and one controlled double-T pendant.
- Removed repeated logo motifs after an earlier candidate review.

SELF-REVIEW

APPROVED

Approved for V2. The updated board is more composed and brand-specific while the single logo element avoids visual repetition.

Implementation, rollback and next batches

This pilot is a reviewed first batch, not a claim that all 360 actions are complete.

IMPLEMENTED NOW

- 4 approved moodboards installed as additive V2 assets.
- App lookup prefers a matching V2 file, then falls back to V1.
- Automated size, aspect and repeated-region screens passed.
- Human visual review approved all four final candidates.

SAFE ROLLBACK

- Original V1 files remain byte-for-byte untouched.
- Each V2 asset has a manifest entry and source checksum.
- Removing or disabling one V2 lookup restores its V1 board.
- Superseded candidates remain available as review history.

NEXT REVIEW BATCHES

- Prioritise the remaining P0 catalog and category decisions.
- Then regenerate P1 full-redo boards in small reviewable batches.
- Apply targeted P2 fixes after the brand-level direction is stable.
- Issue a new before-and-after PDF for each approved batch.

MANIFEST STATUS

- 360 total actions captured from Ellina's review.
- 274 actions refer to existing boards; 86 request additions.
- 43 catalog decisions require verification before generation.
- 4 actions are implemented in this V2 pilot; 356 remain queued.
